

Tower-based wheel alignment

WHEEL ALIGNERS

3D tower

3D target features:

Extremely lightweight

No electronic components inside

No batteries required

No maintenance required

4-point clamps features:

Possibility to use clamps with or without tyre grabbers

Self-centering design

Rim clamping capacity (254 - 610 mm)

HD camera features:

Superior high-definition

LED indicators flash to show roll-back stages

Tracking system automatically adjusts to the cameras to alignment height

Automatic tower movement.

The tower follows the vehicle as it's raised and lowered on the lift, eliminating the need for manual readjustment of the camera and reducing time spent at the console so shops can perform fast and efficient alignments.

Ravaglioli software.

The easy-to-follow animated instructions and graphics guide the technician through the alignment process.
