2-POST LIFTS

Electromechanical

Electronic synchronization.

Internal carriages running **on lubricated sliding guides**, protected from the external environment, that ensures a longer life to the sliding elements.

Short 3-stage arms and long 2-stage arms with quick fit telescopic rubber pad.

Wide rubber protected areas.

The new column geometry allows for quick **replacement of the nut.**

The geometry of the arms was designed to lift anything from city to longwheelbase cars.

Equipped with an acoustic anti toe trap system. Free from mechanical foot guards.

Premium quality of components.

Aluminium pulley with self-ventilating cooling function.

Long lasting bearings.

50% longer, bronze load nut.

Motors with reinforced and cooling casing.

Solid automatic arm locking.

Capacity

3.2

The base has been designed to ensure **maximum stability** even on surfaces that are not perfectly level, thus offering greater flexibility during installation.

The compact design optimizes workshop space, making it the ideal solution for environments with limited space.

Minimum routine maintenance.

The operating parts require little time for easy replacement or maintenance reducing the risk of error on safety elements.

Guaranteed safety and quality over the time.

The lift is equipped with premium components that guarantee durability and maximum safety for the operator.
